# AEA Learning Platform

[www.toamazonia.org](http://www.toamazonia.org)

100% adaptable to cell phones, desktops, and tablets  
Available in English, Spanish and Portuguese

The **AEA Learning Platform** is a collective and virtual space, developed collaboratively with partners and allies of the All Eyes on the Amazon (AEA), in which content, tools, and learning resources for the defense of the Amazon and the rights of their populations are available, intending to share, exchange, and make experiences visible while strengthening capacities with other actors and organizations that work in the Amazon with common goals.

**✓ Culturally adapte**

The Learning Platform is available for everyone, however, it was specially designed for Indigenous leaders, environmental monitors, environmental defenders, activists, researchers and organizations whose focus is the defense of the Amazon. In this sense, formats highlighting the orality of the Amazonian peoples are prioritized such as audiovisual resources.

**✓ Diversity of content and formats**

Learning resources about rights defense, environmental and land monitoring, campaigns and communications, access to justice, in-depth journalism, intercultural health, among others. These resources are available through videos, radio podcasts, case studies, news, stories, and more.

**✓ Responds to the needs of local and Indigenous organizations**

The Platform was developed by the **All Eyes on the Amazon Program** as part of its Linking and Learning component, based on a needs assessment and user experience assessment carried out among members of its partner organizations to optimize its use and accessibility for Amazonian organizations in general.

**✓ Open and collaborative space**

All organizations working for the protection of the Amazon rainforest and the rights of its inhabitants are invited to participate and contribute with their knowledge and experience, as well as to make use of the Platform's contents and resources.

**AEA Academy**

The Platform has an Academy section, in which **100% free, virtual, and culturally adapted certified courses** are available to expand the knowledge and skills on technology, journalism, communication, rights, health and more of Indigenous peoples, local communities of the Amazon and Amazonian organizations in general
